

St. Lawrence County Mattress Recycling Program

Beginning immediately:

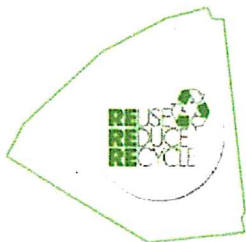

- **Separate mattresses & box springs from other waste**
- **Keep them dry**
- **Take mattresses & box springs to designated area at the transfer stations**
- **Stack them inside the trailer, toward the front**
- **No change to the way you are charged (by weight)**

Mattresses and box springs take up a lot of space in the regional landfill. Instead of dumping them, now they will be taken to Triad Energy in Tonawanda where they will be recycled and the parts re-used. This will help us all reduce our environmental footprint and prolong the life of the landfill, which benefits your community.
